

GILBERT & SCHMALRIEDE

Boat Launching System

SWL 1000 - 10 000 kgs for boats up to 14 m

Our patented design line is developed for boat launching at the stern side of vessels. The embarkation and disembarkation are made comfortable in a very short time.

DESCRIPTION:

The system is guided via rails to the hull substructure with a carriage at the stern side of a vessel to launch tender boats. The carriage is hydraulic motor driven by means of two tooth-belts. A boat bed is connected to the carriage and can be tilted downwards and upwards via a pivot by means of hydraulic cylinders. Guide rolls are fitted in the boat bed in the bottom centre and on both sides.
