

GILBERT & SCHMALRIEDE

Bathing Stair System GS2

Our patented design line is developed for having an easy and comfortable access into or out of the water.

Our bathing stair system includes a bathing stair with self-leveling steps, a stair frame, a valve block and the complete electric system for operating the equipment. The bathing stair itself consists of a part with fixed steps and is 180° pivoted to the bathing stair frame. In stowed position the bathing stair forms a part of the deck and a part of the hull. The bathing stair is driven by hydraulically operated rotary drives.
