## TV Lifting Device GS2

---

Our patented design line is developed to extend a foldable LED TV out of a storage box and turn it max. 350° into an upright position.

---

Our TV Lifting Device folds out by a hydraulic cylinder and brought into working position by two hydraulic cylinders.

The retracting and extending positions of the cylinders are monitored by sensors.

A rotary encoder monitors the rotation movement.

HABM-No.: 005534005-0001
